

MATH 301 Homework 1

Due: Sunday 9/12, 11:59pm; submission on Moodle under Discussion Forum

Read Ros et al. (2020), and answer the following questions.

1. Provide a general description of the application and the synthesis models.
2. Is the application a partial synthesis or a full synthesis?
3. Does the application use the sequential synthesis approach or the joint synthesis approach, or something else?
4. How are the utility and disclosure risks are evaluated in the application?

Be prepared to discuss these questions in class on Monday 9/13.
